# Mines and Prospects--Furnaces and Mills

# Coming With Cash From Majestic

Cheerful Message Accompanied by a Cheerful Letter From President Mucklow.

HARTFORD, Conn., Nov. 2 .- Please annonnce in the press that every dollar's Indebtedness will be discharged November 15. W. B. MUCKLOW.

above quoted message was deliv ered to President Frank Knox of the Narival at his desk yesterday morning. has reference to the balance of the Ma jestic company's indebteduess, amount ing to about \$40,600. Mr. Mucklow, the president of the company, is to be present and to participate with Mr. Knox. who is acting as trustee for all later ests, in the distribution, for which the

ests, in the distribution, for which the moneys are now on hand. In a letter received from the same source by Mr. Knox President Mucklow writes:

"You will be pleased to bear that the bond issue is being placed and that there will be plenty of money to take care of yours and the balance of the indebtedness in year hands as trustee, though it will be impossible for me to get West until about the lith of November, when I shall be prepared to settle everything. If you need 19,000 before this time you can send me a wire and I will wire the money to your credit without a day's delay. In fact, the money is now in hand, but I would like to personally settle up everything about the 18th If you will be good enough to tell our friendly creditors who may make inquiries in regard to the same.

"Of course you have heard that the

Of course you have heard that the

"Of course you have heard that the mines are responding well and when I come it out will be to inaugurate a conservative but comprehensive development go that in the near future we will not the smeller into operation.

"There does not seem to be any opposition in any quarter and now that the market is rising every day and we have saided over \$1,00,000 to the market value of stock during the past four months, the condidence of the constituency is rapidly being restored and we are in receipt of congratulations from all over the contributions of the configuration of the conservation of the congratulations from all over the contributions of the congratulations from all over the contributions of the congrature of the proposition. or congratulations from all ever the com-try for having rescued the proposition from the hands I the New York crowd."

In no portlen I the country are the solendid endeavors of Mr Muckiow appre-ciated as they are in Unit. Meanwhile the properties of the company under the intelligent electric of Fred F Frenden-thal are hourly lacrossing their resources, nor has their resources. that are hously increasing their resources, nor has their condition as a whole at any period in their careor been as graiffying as at present. A considerable amount of lead ore is now arriving at the smelter, while additional wealth is being opened up in the copper-bearing channels, with much to encourage the belief that the smelter will go into commission as projected by the president.

#### MAY DAY'S ORE BODY.

#### Management Has Now Driven on It for Over 100 Feet.

day's reports from the new Lody opened up in the properties of the May Day Mining company continue to May Daiy Aining company continue to emphusipe it as one of the most extraordinary of the large number that have been owned up on Godita mountain. The ties Since it was broken into the management has forged ahead in a continuous and unbroken stretch of ore for ne less than 100 feet, while a cross-cut at one station, it is said, preclaims a width of thirty-five feet between walls. The ore is characteristic of that which has long occurred in that locality and from which the wealth of Godiva mountain has been for many years derived. Some of it is of a very high goads with, of course, the many percentage of second-class while the average will compare favorably with any now coming to market from that source. Of this ore the company had three cars on market yesterday, the product netting it about 25 per ica, in a few days the ore body will have been opened up, that more active stoping may be done, and the month's curnings will anthubitedly show a very pronounced increase.

curnings will instantically show a very pronounced increase. It is the impression of the Uncle Sam management that the ledge extends into its ground and that in a short time it will get a piece of the wealth that is now making a favorite of May Day. Godiea mountain throughout shows greater activity than at any period in several years, and the output of the last quarter will, no doubt, compare with that of any corresponding area in the great district.

## REVENUE MILL STARTS.

#### New Plant Begins on One Hundred Tons a Day.

A message from Roger Knox, manager the Revenue company's interests at Nerris, Ment. advises Mr. Newhouse that the new cyanide mill, with which it has just been equipped, has gone into commission and that 100 tons of sold-hearing ore is now going daily through its crishers. The new machinery, reports Manager Knox, is doing its work with the integrity of an old timer, the solution is taking avidiously to the rock, and the saving promises to show a percentage fully up to that obtained in the laboratory in which exhaustive tests were made. With which to supply the plant a large tomage of ore has been blocked out, with not a little first-class exposed. The Revenue mines that were taken hold of by Mr. Newhouse and Hon C. C. Parsons many years ago, are among the last-known in Montana, and with cyanidation their reimbursement promises to fellow in short time. Nerris, Mont , advises Mr. Newhouse that

## CARISA SHIPMENTS.

#### Management Insists on an Output of | Forty Tons a Day.

The new month at the Carles of Tintle has opened on an output of forty tons daily, the ore, according to a recent setthement, showing an average of 3 per cent copper, 4.7 omces sliver, and \$7.20 gold per ton. The management says its effort will be to maintain an average of forty tons of this class of rock a day, the output going to the furnaces of the Biegium Con, amelter under a most favorable contract with it. Meanwhile the bases are taking out the usual amount of lugh-grade ove and the condition at this time is quite satisfactory.

## CHANGE AT EMERALD.

#### Eighteen Inches of Mineral Below the 800-Foot Level.

Down at the properties of the Emerals Mining company in Tintle the management has now exposed eighteen inches of mineral in a four-feet fissure that has been followed down helow the 800-foot level, and to intercept it on its dip the 800-foot level will be extended. P. J. Donohue, who made a recent examination of the property, says the condition at this time is more favorable to results than ever before and that he looks for an important disclosure before the close of the month. Mr. Donahus will probably inaugurate work at the Open next month, when the smoke of election shall have passed away. ment has now exposed eighteen inches

#### DAY ON 'CHANGE.

#### New York Takes the Star Part in the Hour's Trading.

The day on the mining exchange closes o the sale of 23,058 shares of stock for which \$5268 was paid and with the market exhibiting greater strength than at any has been gradually forging its way up the pike, closed on a transfer at 15% ents, with reports from camp all favorable to further advances, while May Day maintained a firm position around 33 cents, with very little appearing on the counter. Star Con was quite actively dealt in and closed strong notwithstanding its fractional losses, while Silver Shield, which sold at 10 cents the previous day, was reduced to \$12 cents, with Sacramente recording a transfer at 11 cents. Among the stalwarts Daly West led and closed to a good market around \$12, while Victoria was dealt in at \$1.12\frac{1}{2}\text{with Contury going around 26c. Uncle Sam executed an order for a bunch at \$2 cents with Yankee Con, changing hands at \$14 cents and Butter-Libefal at 10% cents, the day closing on the following market: ible to further advances, while May Day

For the Local Smelters. Shipments of ore for the past week rom Tenopan, Goldfield and surrounding amps aggregate 1133 tons from the folcamps agarceate 1133 tons from the following mines and districts, according to the correspondent of the Gazette of Reno, Nev.: From Torcpah-Toropah-Belmont, 70 tons bulk ore and 18 tons sacked ore, Standard Toropah, 29 tons sacked ore, From Goldfield-Bowes-Kernick lease, 18 tons sacked are, Linn lease, 33 tons sacked ore, Guntana-Toropah, 29 tons sacked ore, Guntana-Toropah, 20 tons sacked ore, Florence lease, 56 tons sacked ore. Combination mine, 45 tons sacked ore. The majority of this ore went to the sampler at Reno, a small portion to San Francisco and other small shipments to Sait Lake City. Salt Lake City.

## Important Change in Silver Shield

Ores of Good Quality Unearthed in an Apparently New and Independ-

ent Channel.

While the management of the Silver Shield at Bingham has not encountered the main ore body for which it has been acquired a foothold that promises to lead directly to it. Manager Joseph, who was at the general offices again yesterday morning after an examination of the property reports that in the breast of the workings is now exposed over two feet of ore, a sampling of which revealed as much as \$2 ounces of silver, \$5 per cent lead and \$1.50 gold per ton. The new strike is not, as was the impression on the street, in the main Silver Shield fiasure, but is beyond that meridian some distance, and induces the management to believe that it has made connection with a new and entirely independent channel of wealth. The new ore his now been followed up for twenty-five feet on the strike, and with but one wall exposed. It is the intention to continue the tunnel fifty feet further. In which distance it is expected that the crossing of the fissure with the budded-vein will be reached. At that intersection the main ore body should make, and, according to precedent, it should be a strong and productive one.

From the United Bingham, under the same management, some first-class ore continues to come to the surface and to the valley smellers, while an average of about fifteen tems a day of second-class ore is being reduced to a fine product at the Heaston jigs in Bingham canyon that will continue to operate until cold weather prohibits. Of first-class ore the management reports about 1500 tons blacked out, while testifying to the presence of about send the United Eingham is more assuring than at any period since the deat the general offices again yesterday

660) tons of accond-class. The general condition of the United Eingham is more assuring than at any period since the de-velopment was undertaken and another season's work promises to place it the steady producers of that camp

## The Copper Belt Makes a Record

Nearly Thirty-Five Thousand Tons of Ore Over Its Iron in Month

of October.

Over the tracks of the Copper Belt railway, between the bonanzas of Bingham and the receiving stations on the Rio Grande, there was forwarded in October approximately 30,000 tons of ore, this constituting a new record, although there is everything to foretell its overthrowal by the November output of its patrons. The heaviest consignments during the mouth were those from the exhaustless ore bodies of the Utah Copper company, that have now been opened for over 1000 feet, although the Boston Com, of whose ores are sent direct to the furnaces, led the column, with the Yampa crowding it for first place in that category. From the Commercial group, one of the Bingham Com's Bingham system, came another big tonnage, while Ohlo maintained the usual production.

It is understood that the management of the Bingham and New Haven has promised the Copper Belt an increased tonnage the present month, while consignments from miscellaneous sources should make the November increase a very pronounced one. approximately \$5,000 tons of ore, this con-

Meanwhile the up-freight over the line has continued to increase, and with the projected extension to the mines of the Utah Con. completed, the revenues from this source of traffic will have been ma-terially increased.

terially increased.

In addition to the volume of one that passed over the tracks of the Copper Belt rallway, there were the enermous tonnages over the United States and Ufeh Con, tramways, and while there were interruptions that incurred a loss, the output of the camp for the month was an enormous one.

## CAPT. STERN ARRIVES.

#### Equipment of the Britannia Moving Forward Rapidly.

Capt. Henry Stern, one of the founders t the Tintle Mining and Development of the Tintic Mining and Development company, whose assets embrace not only large areas of mineral-bearing ground at Tintic, but the Yampa mines and smelter at Binsham, came down from the north yesterday, and will devote ten days to his organization's interests in this field. Of the Britannia copper mines out of Vancouver, B. C., from which he has just returned, after conferring with George H. Robinson, the originator of that stupendous undertaking, Capt Stern says that in their equipment excellent progress is being made, with the active production of concentrates to begin in says that in their equipment excellent propers is being made, with the active production of concentrates to begin in March next. When he left the big mill at which 300 tons will be reduced daily was under cover, while the stringing of wire from the tramway, three and one-half miles in length, had begun, with operations within the mines to be resumed in a short time. Mr. Robinson, wao is giving his undivided attention to the campaign of equipment, will return to Sait Lake about January I.

Manager Kelley of the Yampa reports the material for the second furnace with which its smelter is to be equipped, now on the way from Chicago with other material now arriving on the ground, and with everything moving fo an early completion. With present equipment he is reducing 180 tons of ors daily, while the mines are capable of supplying almost any volume. With Capt Stern he will leave for the plant and properties tomorrow.

## BINGHAM CON. EARNINGS.

#### Recent Advance in Boston Strictly on Company's Merits.

The advance in the shares of Bingham Consolidated of late can be accounted for on no other grounds than that the propon no other grounds than that the property possesses intrinsic merit and is worth a good deal more than it is selling for says the Commercial Bulletin of Boston. Of 20,000 shares of capital stock the company has 16,000 shares outstanding and 50,000 in the treasury. Besides this, there are \$1,000,000 6 per cent, ten year, convertible bonds, due October 1 1914, with sinking fund provision. These were issued to retire notes and provide working capital. Earnings at present are between \$55,000 and \$45,000 per month, derived large, but satisfactory as these are under present circumstances, there is every probability that, with the fifth stack in commission, and with the company treating the own mines of the fifth stack in commission, and with the company treating the same statement of the same server is a materially larger volume of ores from its own mines, earnings will amount to \$00,000 or \$75,000 carry in 1905. Indeed, we are told that the expectations of the management exceed even these figures, but owing to the fear of giving rise to hopes that later may be disappointed the management is reductant to paint the future too brightly.

## CON MERCUR INQUIRY.

#### Eastern Interest Shows Some Uneasiness Over Dividends. Replying to a query from Littleton, N

concerning the continued absence of

Replying to a query from Littleton. N. H., concerning the continued absence of Consolidated Mercur from the dividend culumn after distributions aggregating \$1,-20,812, the Investor of Boston says:

"The company announced, May, 1903, that it would pass two or three dividends for the purpose of installing the Moore slime process. It was not thought that it would take more than sixty days to complete the changes and have the mill in operation again so as to resume dividends. The estimated cost at the time was in the neighborhood of \$12,000. The outcome shows that the company paid out \$5,521,27 for the slime plant construction. Since the publication of the annual report of the company it is generally understood that the average value of the or has increased somewhat, and the mill is handling a little larger tonnage. At present about 700 tons per day are being treated, and the mine is yielding a few thousand dollars not profits per month. Whether there will be any dividends soon remains yet uncertain. The company will, however, not pay any dividends multi there is a sufficient sum in the treasury to warrant the posting of such. The cash on hand and in the bank, including buillion in transit, was only \$223.84 on the 59th of June It is understood that the net profits have increased this sum quite considerably. The general advance in the property and a belief that it would continue as development and operation continue. The condition of the mines and the sarnings of the mill at this time, it might be added, are more satisfactory than at any period in many months.

MADE ITS PAYMENT.

#### MADE ITS PAYMENT.

#### Owner of Copper Queen Draws Down More Money.

The third payment on the Copper Queen group at Stockton was made yesterday by Fred C. Richmond in behalf of the Honerine West Mining company, with two more to be made as they shall mature, the proceeds going into the pockets of Max Raddatz. It is not the intention of the management to inaugurate active work on the company's properties that are among the most extensive at Stockton, until the leng drain tunnel now going into the zone has topped its territory, although it is in possession of known ore bodies, samples from which reveal material of excellent quality.

Superintendent Raddatz of the Honerine, who was in town during the day, reports the ore body in the Bull chute on the 20-foot level opening up as have the others, and with everything to indicate a big one. The third payment on the Copper Quee

#### MAMMOTH GOLD ORES

#### Management Comes Forward With Another Fine Exhibition.

Another Fine Exhibition.

The Mammoth of Tintic was upon the market during the day with three lots of ore that offered splendid evidence of its resources. A consignment of thirty tons was marketed on controls showing as much as \$45 gold, with 4.3 conces silver, while one of the 33 tons showed \$40 gold with 6 concess silver per ton. A third consignment was settled for on controls showing 6.7 per cent copper and 26 cances silver, with \$10.00 gold per ton. The clean-up at the mill is now in progress and a nice piece of money is expected from its pans.

## Boston Market Boiling.

Special to The Tribune. Special to The Tribune.

BOSTON, Mass. Nov. 2.—The copper market has been belling almost from start to finish. Under the lead of Amalgamated everything has tried to keen in the running and prices ionight are very much better than they were last night. Everybody is in the best of humor and if this keeps up, this part of the country will be in a very happy frame of mind. Market closed active and strong. Horn-blower & Weeks, brokers. M State street, Beston, and 19 Wall street, New York, furnish the follewing quotations:

#### BUSCH IS ANGRY.

#### Millionaire Brewer Resigns From the World's Fair Directory.

ST. LOUIS, Nov. 2 - Adolph Busch, the nillionaire brewer, who is prominently connected with one of the largest concessions on the Pike, has tendered his resignation as a director and a member of two of the most important commit tees of the World's Fair company.

Mr. Busch declares that he has resigned from the fair directorate because

of discrimination made against a con-cession with which he is connected, "I have spent considerable time and money to make the concession possible at the fair," said Mr. Busch, "and I do not like the treatment we have been ac-corded by the fair management. We in corded by the fair management. My interests are such that I do not care to retain my position as director of the fair, and I resigned for that reason. It

#### Sleeplessness 13 8 Sign of Nerve Trouble and Should Be Looked To.

There are three different manifestations of sleeplessness.

First, hardly to sleep a wink all night, second, to he awake a long time before falling asleep; third, to fall asleep soon, waking up after several hours and then find it hard to sleep again. They mean that somewhere in the

nerve fibres, somewhere in the brain cells, somewhere in the blood vessels that carry blood to the brain, something is radically wrong, and must be righted, or the end may be worse than death.

To right it, take Dr. Miles' Nervine. Some other symptoms of nerve trouble are: Dizziness. Headache, Backsche, Worry, Fretfulness, Irritability, Melancholy, Lack of Ambition.

They indicate diseases which may lead to Epilepsy, Fits, St. Vitus' Dance, Nervous Prostration, Paralysis, Insanity, Nothing will give such quick and lasting relief as Dr. Miles' Nervine.

Ing relief as Dr. Miles' Nervine.

"My husband had been sick for weeks, could not sit up to have his bed made. With all the medical help we could get he continued to grow worse. He could neither sleep or eat. Our baby girl was sent away, and all callers barred, because he could not stand a bit of talking. I read of a case of nervous prostration cured by Dr. Miles' Restorative Nervine. We began giving it to him, and in a tew days he was able to be dressed. From that time he steadily improved. Nervine saved his life."
